

## SUMMER PERIL

One of the greatest dangers during hot weather is the various bowel complaints. They come so quickly, cause such intense suffering and are so dangerous that every home should have a remedy on hand for immediate use.

## Ramsey's Cholera and Diarrhoea Runaway

Is a certain cure for colic, cholera, diarrhoea and all similar troubles. It checks the disease as quickly as it should be checked, and relieves the pain almost instantly. Given at the first sign of trouble it obviates all possibility of danger, is sure to prevent suffering and saves several times its cost in doctor bills.

NOBLE BROS.

### Mortuary.

The infant of Mr. and Mrs. G. A. Nait, died yesterday afternoon at the family residence. The remains will be taken to Collinsville, Tex., this afternoon where they will be interred tomorrow morning.

## INVESTIGATE WASTEGATE.

Waterworks Inspector Brodnax Makes Investigation Yesterday Afternoon. Waterworks Inspector Brodnax accompanied by Contractor Murry, of the Henry C. Lien Co., who is putting in the water and sewer mains, visited the waterworks lake yesterday afternoon to investigate if danger might arise from the recent heavy rains. The report was received yesterday morning that the water was flowing over the wastegate about four inches deep, and it was feared would crumble away the walls of that gate. As soon as this information was learned, Mr. Brodnax made immediate arrangements to go to the lake and spend the greater part of the day there. He returned late yesterday afternoon. In speaking of the probable damage to the wastegate and dam he said there had been no damage done so far to either, but should a watershed occur the wastegate would be damaged, but the dam could not in his opinion, be injured by all the water that the lake could hold. Mr. Brodnax said this is the first time the water has ever flowed over the wastegate since the lake has been built, and there is ten or twelve more inches of water in the lake at present than at any time in the past. As a remedy for any damage which might occur to the wastegate, Mr. Brodnax suggests that a dam be built so as to carry the water over the wastegate, without damage to the wall. This he says can be done by building something like a trough which will make the water rise higher than the wastegate without beating against it. Mr. Brodnax and City Engineer Dean will visit the lake in the morning at which time Mr. Dean will give his opinion as to what course the city should pursue.

### Chickasaw Lake Club.

The directors of the Chickasaw Lake Club met this morning and made new rules with regard to the protection of bass that all the stockholders will be interested in. All bass between 10 and 15 inches may be taken from the water and each member is allowed to catch one fish each week measuring more than fifteen inches.

### Sidewalks for School Children.

It comes as a safe and a welcome piece of news that the board of public school trustees will pave the front and approach to the steps of each school ground in the city. This should be done and at once. September 15th marks the opening of the schools and over 1700 children will move up to the public school doors. They have waited long enough through school grounds of mud and the citizens of the city will commend the present progressive school board if they will carry out this fine plan.

### Overtopping the hills of confusion.

Overtopping the hills of confusion and confusion was the summerland of life.

### RELEASED ON BOND.

Otis Edwards, charged with Assault to Kill, Allowed Bond. Otis Edwards, who was placed in the federal jail here Wednesday and charged with assault with intent to kill, was released on bond in the sum of \$500 this morning. The bond was granted by District Attorney Walker. In the absence of the commissioner, Edwards is charged with shooting William Addington near Brock several days ago and with two other parties was placed in jail here. The other two have not made bond yet, but it is said they will. Addington, whom it is claimed Edwards shot, is getting along nicely and it is thought he will recover.

Both the parties in the case are well known around Brock and have good reputations.

H. S. Morse of Loco is in the city and states that there has been no mail received at Loco since Saturday. He said in coming to Ardmore he passed fields of cotton which were four feet under water. Mr. Morse does not attempt to estimate the damage which the rain will do in his section of the country, but stated he fears it will be great.

### Bad Man From Bitter Creek.

Marshal Porter was called to a joint on Caddo street this afternoon to quiet the actions of an intoxicated gentleman, who had talked too freely and was expressing his opinion of people and things in general. He was the center of a group in the joint, flourishing a small double-barreled derringer pistol, and declaring himself. He poked the mouth of the gun in the faces of the helpless witnesses who did not enjoy the show which the individual was putting on. Mr. Porter responded immediately to the call but when he reached the scene the bird had flown and a diligent search failed to bring to light the bad man. Up to this time he has not been apprehended, as when he heard the marshal was coming he vanished.

All the dirty things of the season will be sold at the Y. M. C. A. Saturday market at Noble Bros. 10

## FROM THE FLOODED DISTRICTS.

Reports Continue to Come of Serious Damage by High Waters.

From all over the north portion of the country, comes reports of heavy damage by the excessive rains of the past few days.

Reports from Texas, are to the effect that the state has had more than its portion of the water fall. Communication with points north which has been cut off for the past four days has prevented a full report of the damage being made known. Telephone lines are down and it is exceedingly hard to get communication with points in that direction.

Reports received from Berwyn state the Washita river which is only about four miles north of that place is higher than at any time before in this memory of the oldest citizen, and has done much damage to farms in the lowlands. Menager reports from other places east of there are being received and it is the general report that where there is a creek of any size it has overflowed its banks and is playing havoc with the crops of the country.

From Ada and on the Frisco it is learned that the rain fall was the heaviest in years and that a creek near there called Sandy attained about an eight foot rise, and destroyed thousands of acres of fine crops in the bottom.

From Francis reports come saying that the Canadian is out of its banks, and a rise of more than eight feet has come from the head of the river. The Frisco bridge across the Canadian which was reported as being in a serious condition, has been crippled by fourteen bents being washed out, and the river is still rising at that point.

It is estimated that the Santa Fe track at Dougherty is under eight feet of water, while at Pauls Valley the road both north and west of the city has been out for four days. It is reported that the telegraph agent, J. W. Curley, stationed at the Santa Fe office at Junction station has abandoned his post on account of the water which has flooded his office. The damage at Pauls Valley is reported as being very small compared to the vast amount of water which the recent rains and rises on the creeks near the city has surrounded that point with.

There has been no loss of life reported from the floods, and very little loss of cattle so far, but a large loss of cattle and domestic animals will occur doubtless.

W. E. Moxson, recently elected General Superintendent of the Santa Fe, with headquarters at Galveston, came up in a special car yesterday to view the work of the floods, and is stationed at Dougherty, having been unable to get further north. With him are a number of other officials. They are unable to proceed north but will remain and watch the work of repairing the railroad, which is now under construction. The Santa Fe has an army of workmen stationed at the place where the washouts occurred, and they are working night and day to keep more of the track from washing out.

Two passenger trains were run in here yesterday from the south, and one went as far north as Dougherty, twenty miles from here. They will also run a train this afternoon at 5:25 to Dougherty and then return, going south about eight o'clock. The Santa Fe will maintain this train from Cleburne to Dougherty and return once a day so long as the washouts continue to interfere with traffic.

### Wounded Woman Dies.

The marshal's office, at this place received word today to the effect that the negro woman who was shot five times at Chickasha about a week ago by Ben Anderson, also a negro and her husband, died at Chickasha this morning from the effects of the wounds. Anderson was placed in jail here on the sixth of August, charged with assault with intent to kill. He will now be held for murder. It is alleged that Anderson became jealous of his wife and shot her with a pistol.

### Grand Jury Return Indictments.

By Associated Press. Jamestown, N. Y., Aug. 10.—The federal grand jury today returned indictments against the Standard Oil company of New York, Pennsylvania Railroad and vacuum Oil company of Rochester, for violation of Interstate Commerce law.

### FOUND DEAD AT EMET.

Dave McCormick Supposed to Have Died of Heart Failure. Ardmoreite Special.

Milburn, I. T., Aug. 10.—Dave McCormick, aged 30 years, was found dead at the home of his uncle at Emet, a small town three miles south of here, early this morning. Heart failure is supposed to have been the cause of his death.

Patronize the ladies Y. M. C. A. market at the Noble building Saturday afternoon.

## DELEGATE, FIREMEN, FRIENDS.

Will Leave in the Morning at Six O'clock for Roanoke, Va.

The special car in which the delegates to the National Firemen's convention, to be held at Roanoke, Va., from this place are to attend the convention, was brought in this afternoon over the Frisco and awaits the six o'clock passenger over that line, at which time the party will leave for St. Louis, where they will join the Firemen's Special, composed of Pullman sleepers, which will take them direct into Roanoke. The car is being decorated tonight, and large banners, bearing the words, "Ask About Ardmore, Indian Territory," are being placed on either side of the car. The party which is composed of three delegates from the fire department here, and a number of their friends and several others who will make the trip for pleasure's sake, will leave in the morning. The convention begins on the 13th of this month and lasts three days. Many will remain some time to visit old friends and homes. The trip is a most pleasant one and will be enjoyed by all who accompany the party.

They will be joined by several others from surrounding points and altogether a merry party will be aboard the car.

As has been stated they will distribute literature about Ardmore, at every place the train stops and also at Roanoke, where the convention is to be held.

### Picnic at Durant.

Durant, I. T., Aug. 9.—A three day picnic under the auspices of the Old Settlers' Club began today. Several prominent speakers will address the crowds, including Capt. S. W. McKenney of South McAlester, Hon. Lee Cruise of Ardmore, candidate for governor, and Hon. T. C. Humphrey of Atoka, besides other speakers of note. Hundreds of visitors from neighboring towns are in attendance.
